**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-24**

**Wildlife Risk Calculations Based on Modeled Tissue and Dietary Toxicity Reference Values for Aquatic+Terrestrial Receptors**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-25**

**Wildlife Risk Calculations Based on Modeled Tissue and Dietary Toxicity Reference Values for Riparian Receptors**

**Reach C2, Subarea Soil - Riparian**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Soil EPC (mg/kg) | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | Aquatic Plants | Terrestrial Plants | Benthic Invertebrates (odonata larvae) | Soil Invertebrates (worms) | Aquatic Emergent Insects | Terrestrial Insects (Grasshoppers) | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small mammals/ birds |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-27**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Terrestrial Receptors**

**Reach C2, Subarea Soil - North**

**Anniston PCB Site, Anniston, Alabama**

| Terrestrial Receptors | COPC | Soil EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | Measured Tissue (mg/kg dry weight) | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | Terrestrial Plants | Terrestrial Insects | Worms | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small Mammals | Soil | Terrestrial Plants | Terrestrial Insects | Worms / Spiders / Detritivores | Small Mammals |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-30**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Aquatic+Terrestrial Receptors**

**Reach C2, Subarea Soil - North**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Soil EPC (mg/kg) | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | Aquatic Plants | Terrestrial Plants | Benthic Invertebrates (odonata larvae) | Soil Invertebrates (worms) | Aquatic Emergent Insects | Terrestrial Insects (Grasshoppers) | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small mammals/birds | Aquatic Oligochaetes |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-32**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Aquatic+Terrestrial Receptors**

**Reach C2, Subarea Soil - Central**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Soil EPC (mg/kg) | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | Aquatic Plants | Terrestrial Plants | Benthic Invertebrates (odonata larvae) | Soil Invertebrates (worms) | Aquatic Emergent Insects | Terrestrial Insects (Grasshoppers) | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small mammals/birds | Aquatic Oligochaetes | Mollusc | Crayfish |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-33**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Riparian Receptors**

**Reach C2, Subarea Soil - Riparian**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Soil EPC (mg/kg) | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | | | | |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-50**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Riparian Receptors**

**Reach C3, Subarea Soil - Riparian**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Soil EPC (mg/kg) | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | Aquatic Plants | Terrestrial Plants | Benthic Invertebrates (odonata larvae) | Soil Invertebrates (worms) | Aquatic Emergent Insects | Terrestrial Insects (Grasshoppers) | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small mammals/birds | Aquatic Oligochaetes | Mollusc | Crayfish |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-57**

**Wildlife Risk Calculations Based on Modeled Tissue and Dietary Toxicity Reference Values for Terrestrial Receptors**

**Reach C4, Subarea Soil - South**

**Anniston PCB Site, Anniston, Alabama**

| Terrestrial Receptors | COPC | Soil EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | Bioaccumulation Factors | |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-64**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Aquatic+Terrestrial Receptors**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-65**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Aquatic+Terrestrial Receptors**

**Reach C4, Subarea Soil - South**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Soil EPC (mg/kg) | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | Aquatic Plants | Terrestrial Plants | Benthic Invertebrates (odonata larvae) | Soil Invertebrates (worms) | Aquatic Emergent Insects | Terrestrial Insects (Grasshoppers) | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small mammals/birds | Aquatic Oligochaetes | Mollusc | Crayfish |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-66**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Riparian Receptors**

**Reach C4, Subarea Soil - Riparian**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Soil EPC (mg/kg) | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | Aquatic Plants | Terrestrial Plants | Benthic Invertebrates (odonata larvae) | Soil Invertebrates (worms) | Aquatic Emergent Insects | Terrestrial Insects (Grasshoppers) | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small mammals/birds | Aquatic Oligochaetes | Mollusc | Crayfish |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-72**

**Wildlife Risk Calculations Based on Modeled Tissue and Dietary Toxicity Reference Values for Terrestrial Receptors**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-75**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Aquatic Receptors**

**UAA**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | Aquatic Plants | Benthic Invertebrates (odonata larvae) | Aquatic Emergent Insects | Aquatic Oligochaetes | Mollusc | Crayfish | Fish (all sizes) | Predator Fish | Forage Fish | Reptiles | Amphibians | Sediment |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-76**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Terrestrial Receptors**

**UAA**

**Anniston PCB Site, Anniston, Alabama**

| Terrestrial Receptors | COPC | Soil EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | Measured Tissue (mg/kg dry weight) | | | | Body Weight (kg) |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | Terrestrial Plants | Terrestrial Insects | Worms | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small Mammals | Soil | Terrestrial Plants | Terrestrial Insects | Worms / Spiders / Detritivores | Small Mammals | Body Weight (kg) |

**Notes:**
COPC = constituent of potential concer
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight pe
LOAEL = lowest observed adverse effe
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect l
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients grea**

**Table E3-77**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-78**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**

**Table E3-92**

**Wildlife Risk Calculations Based on Measured Tissue and Dietary Toxicity Reference Values for Aquatic+Terrestrial Receptors**

**Reach C5, Subarea Soil - South**

**Anniston PCB Site, Anniston, Alabama**

| Aquatic Receptors | COPC | Soil EPC (mg/kg) | Sediment EPC (mg/kg) | Water EPC (mg/L) | Percent Diet (%) | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | Aquatic Plants | Terrestrial Plants | Benthic Invertebrates (odonata larvae) | Soil Invertebrates (worms) | Aquatic Emergent Insects | Terrestrial Insects (Grasshoppers) | Terrestrial Spiders / Detritivores | Riparian Spiders / Detritivores | Small mammals/birds | Aquatic Oligochaetes | Mollusc | Crayfish |

**Notes:**
COPC = constituent of potential concern
dw = dry weight
EPC = exposure point concentration
kg = kilogram
kg dw/kg-day = kilograms dry weight per kilograms per day
LOAEL = lowest observed adverse effect level
mg/kg = milligram per kilogram
mg/L = milligram per liter
NOAEL = no observed adverse effect level
OU = Operable Unit
tPCB = total polychlorinated biphenyl
TRV = toxicity reference value
**Bold indicates hazard quotients greater than 1**
